

AIREX TITAN OUTLET™ RETROFIT

Seal HVAC line set wall penetrations
with a clean, professional finish.

The AIREX Titan Outlet Retrofit is a two-piece engineered wall enclosure designed for existing installations. It seals HVAC piping penetrations to prevent air leaks, moisture intrusion, vibration, and pest entry while delivering a clean, finished look homeowners appreciate.

Key Benefits

- Prevents air leakage and moisture penetration
- Helps block rodents and pests
- Supports piping to reduce vibration and noise
- Improves energy efficiency and indoor air quality
- Durable weather-resistant materials
- Professional finished appearance for every install
- Made in the USA

The AIREX PRO-SYSTEM KIT™ is a 2-in-1 solution that seals HVACR piping through exterior walls to prevent air leaks (AIREX TITAN OUTLET™) and protects pipe insulation from weather and damage (AIREX E-FLEX GUARD™). The TITAN OUTLET™ mounts to exterior walls and isolates piping with an elastomeric sleeve, while the E-FLEX GUARD™ attaches with a stainless-steel clamp for durable, long-term pipe protection.

Now available at Bender. Upgrade your installs with a cleaner, sealed finish. Sold as a kit and available in white and grey. Ask your Bender rep for details.
